## 1. 什么是绿佳保?

Alfalmint is a type of oral nutritional juice containing alkaline oxidation acts as a catalyst agent to help enhance human antioxidant index. The handling process treats the energy of anions of which the easy absorption of molecules of small tiny minerals and nutrients into body cells in achieving effective results of detoxification, rehabilitation and cell nourishment.

The application of American latest technology by extracting chlorophyll with low temperature from the fresh alfalfa and mint leaves which gets formulated after being concentrated. Having a long-term consumption not only helps improve the body internal organs by resuming the natural functioning, coordination, balancing the organ system in optimising the functionalities to the fullest but also to promote blood circulation, skin beautification, vitality preservation in contributing to conduce metabolism.

This product from Belina has a great assurance of being the essential healthcare oral nutritional juice for all walks of life, particularly the different age groups and vegetarians. The effectiveness shows irrefutable evidence to offer harmonising the body five elements to get reconciled to its best level. This is regarded to be the wise choice of every household!

绿佳保是一种碱性催人体抗氧指数极高的保健口服营养液。透过负离子能量化处理, 它细小的矿物质与营养分子能轻易地被人体细胞吸收, 从而达到解毒, 修复与滋养细胞。绿佳保是采用美国低温萃取的科技, 从新鲜的紫花苜蓿叶和薄荷叶中萃取出叶绿素, 再以浓缩科技配制成。长期饮用绿佳保不但能提升人体器官运作, 也能协调及平衡器官系统以获得完整功能的发挥, 有助于血液循环, 新陈代谢, 美化皮肤和保持活力。堪称促进人体内和谐的五行极品”也不为过。

## 2. Main Ingredients 主要成分

### Alfalfa 紫花苜蓿

Alfalfa has rich nutritional values in vitamins, such as A, B6, B12, C, D, E, K; amino acid, carotene, fibre, micronutrients, vegetable fats, antioxidant nutrients (polyphenol tannin), folic acid, enzymes as well as some other various families of vitamin.

Alfalfa is also found rich in calcium, iron, magnesium, potassium, phosphorus and many more varieties of mineral with over three hundred species of phytonutrients. It is worthy to deserve the reputation as 'Father of Food'.

## 3. The Molecular Structures of Chlorophyll and Hemoglobin 叶绿素和血红素的分子结构

In fact, there is a similarity of molecular structures between chlorophyll and hemoglobin. The one and only difference is having the separate cores, namely magnesium atom and iron atom. Meanwhile, the core of chlorophyll contains magnesium atom belongs while the core of hemoglobin carries iron atom, respectively. This theory concludes that chlorophyll brings significant advantages to human body by not just only to perform the functions but also to increase the amounts of hemoglobin.

叶绿素的分子结构是相似于血红素(一种球蛋白和亚铁血红素组成的血红蛋白), 主要功能是将肺部的氧气输送到身体各个组织。唯一的分别就是个别的核心为镁原子与铁原子。叶绿素的中心原子是镁, 而血红素是铁。依据这一原理, 可以推断叶绿素对人体的好处是可以行使血红素的功能, 并增加其数量。

紫花苜蓿的营养价值颇高, 富含维生素A, B6, B12, C, D, E和K, 氨基酸, 胡萝卜素, 纤维, 微量元素, 植物脂肪, 抗氧化营养素(多酚类单宁), 叶酸及酵素等非同维生素; 同时亦富于钙, 铁, 镁, 钾和磷等矿物质, 以及300多种植物营养素。因此, 更被冠上“食物之父”的美称。

### Mint 薄荷叶

## 4. The Effectiveness of Alfalmint 绿佳保的功效

1. To enhance functions of thyroid gland
2. To eliminate free radicals and to protect body cells
3. To balance blood, pH values and eliminate body odour
4. To promote detoxification and blood purification
5. To strengthen functions of kidneys and urinary bladders
6. To stop worry of constipation and promote metabolism
